360-12131  
CHRYSAI CONCENTRATED  
CLEANER 1 QT

The first step to ensure all your tools and dosing units are free of limescale and organic dirt. It is a gentle product with degreasing action, bio - degradable and user-friendly. Flowers and plants stay fresh longer when placed in hygienically clean buckets, vases and trays and when they are processed with hygienically clean tools.

360-12003  
CHRYSAI FLOWER FOOD  
PACKETS 1000

Extends the vase life up to 60% longer when compared to the use of water alone. It mixes easily in water, it is odorless, providing all the necessary ingredients for full development of buds and blooms. The improved design ensures proper dosing for a user-friendly experience.

CULTIVATING FRESH

360-12324  
CHRYSAI GERB TABLETS  
800CT

Is a conditioner for cut flowers to be used by growers, bouquet makers and florists. It is an easy-to-use tablet which helps to maintain a good quality of leaves and flowers. Chrysal CVBN is more effective against bacteria than any other chlorine product. It also neutralizes the damage caused by certain flowers, such as daffodils, in bouquets.

360-12730  
CHRYSAI PROF #2 T-BAGS  
520CT

Gives excellent results with visual control, hydrating the flowers and supplying them with enough food to survive the display period without premature development. Just drop T-Bag in clean bucket, fill with amount of water indicated on T-Bag and place your flowers in the bucket. The unique formula will permeate the bag and self distribute throughout the water, leaving the T-Bag floating in the bucket for visual control.

360-90334  
CHRYSAI PRO #3 VASE  
W/PUMP 1 GAL

Vase & Design solution for all cut flowers, with nutrients which keep the flowers in peak condition. Chrysal Professional 3 can be used to stimulate bud opening of immature flowers. This product comes in powder and liquid form.

CULTIVATING FRESH

360-12016  
CHRYSAI PROF #2  
W/PUMP 1 GAL

Transport and holding solution that provides nutrients for the natural development of flowers while preventing flowers opening too soon. The solution can be used up to 5 days, reducing the necessity to change the water as frequently. It reduces wastage by an average of 50% compared to water alone

360-12139  
CHRYSAI ROSE PRO  
W/PUMP 1 GAL

This solution is formulated to be in cold stores and shops. These specially designed clear formulas will improve the leaf quality and prevent bent-neck.

360-99200  
**CHRYSA, HAWAIIAN FLORAL MIST**

The first and only bio-reactive floral spray. Its exclusive formula penetrates, and re-hydrates cut flowers, greens and even house plants! When Hawaiian Floral Mist mixes with the biology of the plant, it sustains life from the inside! Ideal for tropical flowers and orchids and suitable for all flowers

**CHRYSA, EASY DIP 1GAL**

Chrysal Easy Dip is a ready-to-use product to stimulate the opening of flower stem vessels. The cut flowers are dipped for only a couple of seconds before putting them on a conditioning product, such as Chrysal Clear Professional 2. This results in better hydration and reduction of bent-neck.
